

CareerPocket AI

Setup Guide

Everything you need to get started

Last updated: June 2026 | Applies to v1.1+ | trusted-aide.com

In This Guide

1. Requirements
2. Getting Your AI API Key
3. First Launch — License Activation
4. Setting Up Your Backup Folder
5. Building Your Master Resume
6. Installing the Job Capture Bookmarklet (Beta)
7. Your First Job Score
8. Generating Cover Letters and Tailored Resumes
9. Career Chat — Your AI Advisor
10. Switching Computers
11. Getting Help

1. Requirements

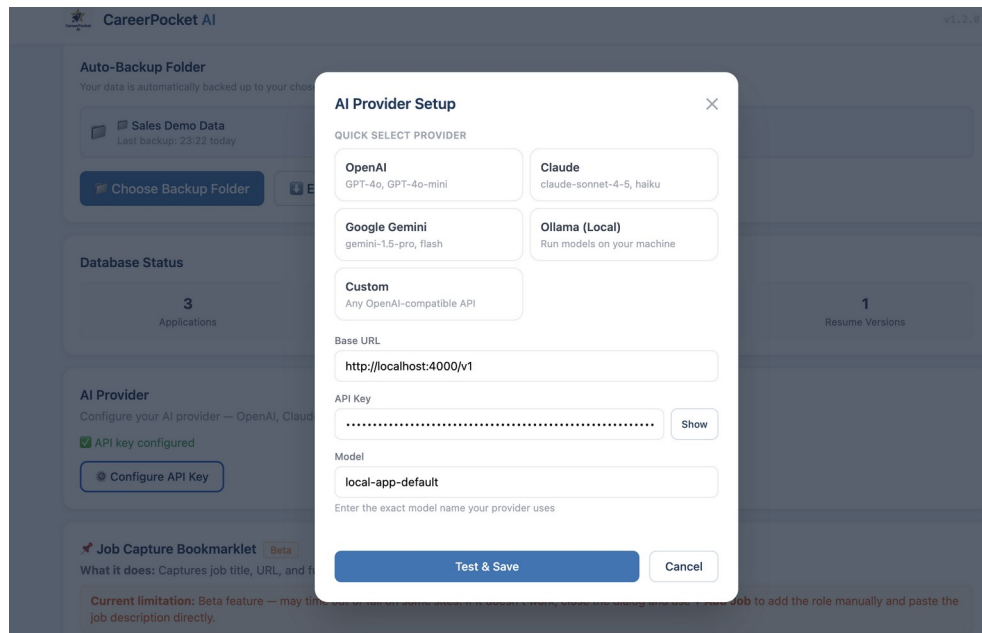

CareerPocket AI runs entirely in your browser. You need:

- Browser: Google Chrome or Microsoft Edge (latest version) on Mac or Windows
- Internet: Required only for AI features — everything else works offline
- AI Provider: Any AI API key (OpenAI, Anthropic Claude, Google Gemini, or any OpenAI-compatible provider) — or a free local AI model for zero cost and complete data isolation
- Cloud Folder: A Dropbox, OneDrive, or Google Drive folder for automatic backups

***i** Safari and Firefox are not currently well-supported — they lack the File System Access API needed for automatic backups. Additional browser support in future updates.*

2. Getting Your AI API Key

CareerPocket AI uses a Bring Your Own Key (BYOK) approach. You connect any AI provider — your data goes directly to the provider you choose, never through our servers.

Option A: OpenAI

1. Visit platform.openai.com and sign up or log in.
2. Go to Settings, then Billing. Add a credit card. Usage-based pricing — typical job search costs USD 1–3 per month.
3. Go to API Keys. Click "Create new secret key". Name it "CareerPocket". Copy the key immediately — you won't see it again.
4. In Settings > Limits, set a monthly budget of USD 5–10 to prevent unexpected charges.
Your API key looks like: sk-proj-xxxxxxxxxxxxxxxxxx

Option B: Anthropic Claude

1. Visit console.anthropic.com and sign up.
2. Add billing. Go to API Keys and create a key.
3. In CareerPocket AI Settings, change the AI Base URL to: <https://api.anthropic.com/v1>
4. Select the model: Eg. claude-sonnet-4-6 (or your preferred model)

Option C: Google Gemini

1. Visit aistudio.google.com and sign in with your Google account.
2. Click "Get API key" and create a key.
3. In CareerPocket AI Settings, change the AI Base URL to:
<https://generativelanguage.googleapis.com/v1beta/openai>
4. Select the model to: Eg. gemini-3.5-flash (or your preferred model)

Option D: Free Local AI Model

For zero token cost and complete data isolation, run a local AI model:

1. Install Ollama (ollama.com) or LM Studio (lmstudio.ai) on your computer.
2. Download a model (e.g., Llama 3, Mistral, or Qwen).
3. In CareerPocket AI Settings, set the AI Base URL to: <http://localhost:11434/v1> (Ollama) or <http://localhost:1234/v1> (LM Studio)
4. Set the model name to match what you downloaded.

***i** With a local model, nothing leaves your computer at all — complete data isolation. Quality depends on the model size; larger models give better results but need more RAM. Also, you save on expensive API cost over the long term because everything runs off your local machine. However, your local machine need to be powerful enough to run an effective local model.*

***i** Your API key is stored locally in your browser and backup folder. It is never sent anywhere except directly to your chosen AI provider.*

***i** If unsure how to set up a local AI Model, can reach out to any vendor, or our reseller. Alternatively can send a support mail to support@trusted-aide.com. A chargeable service fee applies for remote assistance to set up.*

Option E: Custom (Any OpenAI-Compatible API)

CareerPocket AI works with any provider that exposes an OpenAI-compatible API.

In Settings, select Custom under Quick Select Provider.

Enter your provider's base URL, API key, and model name. This includes services like self-hosted endpoints.

3. First Launch — License Activation

Step 1: Open CareerPocket AI

Visit <https://careerpocket.trusted-ai.de.com> in Chrome or Edge.

Step 2: Enter Your License Key

Your license key was provided with your purchase. It looks like one of these formats:

- Direct Purchase key: EXEC-CC-XXXX-XXXX-XXXX-XXXX-TT
- Subscription key: A UUID format like a1b2c3d4-e5f6-7890-abcd-ef1234567890

Paste it into the activation field and click "Activate CareerPocket AI".

Step 3: Complete the Setup Wizard

The wizard walks you through entering your name, contact details, career objectives, and AI API key. Follow each step — all information stays in your browser.

 *Bookmark the page after activation. Your license key is remembered automatically on the same computer and browser. Note also that the database used is tied to your browser login account. If you used a different login account, the database will be different.*

4. Setting Up Your Backup Folder

CareerPocket AI stores all your data in the browser – tied to your login account. To protect against data loss and enable switching computers, set up a cloud backup folder.

Step 1: Create a Folder

In your Dropbox, OneDrive, or Google Drive, create a folder called "CareerPocket" (or any name you prefer).

Step 2: Connect the Folder

In CareerPocket AI, go to Settings. Click "Set Up Backup Folder". Your browser will ask you to select a folder — choose the one you just created. Click "Allow" when asked for permission.

Step 3: Automatic from Here

Every time you make a change (add a job, update your resume, change settings), CareerPocket AI automatically saves a backup to this folder. No action needed from you.

i The backup folder also stores your license key and API key. When you switch computers, just select the same cloud folder and everything restores automatically.

i If your browser asks to re-grant folder permission after a restart, click "Allow". This is a Chrome security feature, not a bug.

i If you have multiple browser account (eg. Different chrome/google logins), you need different folders for each account so as not to have different account overwrite each other's data to the same folder.

5. Building Your Master Resume

Your master resume is the foundation of everything CareerPocket AI does. AI features use it to score jobs, write cover letters, and tailor resumes.

Professional Summary

Coach Save

Experienced IT professional with over 10 years in the hospitality industry. Responsible for managing IT systems and supporting hotel operations. Hardworking team player with good communication skills and a passion for technology. Looking for a challenging role where I can use my skills and grow my career.

Track Records & Achievements

Coach Add

No achievements yet — upload a resume or click + Add.

Core Competencies

Coach Add

Property Management Systems (Opera, PMS) × Point of Sale (POS) systems × Microsoft 365 administration × Active Directory ×

Windows Server × network management × IT support × backup and recovery × vendor management × PDPA awareness ×

troubleshooting × team leadership × Microsoft Office ×

Add competency... Add

Professional Experience

Strengthen All Add Role

Option A: Upload a Resume (Recommended)

Go to the Resume tab. Click "Upload" and select your resume file (PDF or Word). The AI will extract your information into structured sections: summary, competencies, experience, and education.

Option B: Paste Resume Text

Click "Paste" and paste your resume text. Click "Process" to let the AI structure it.

After Upload or Paste

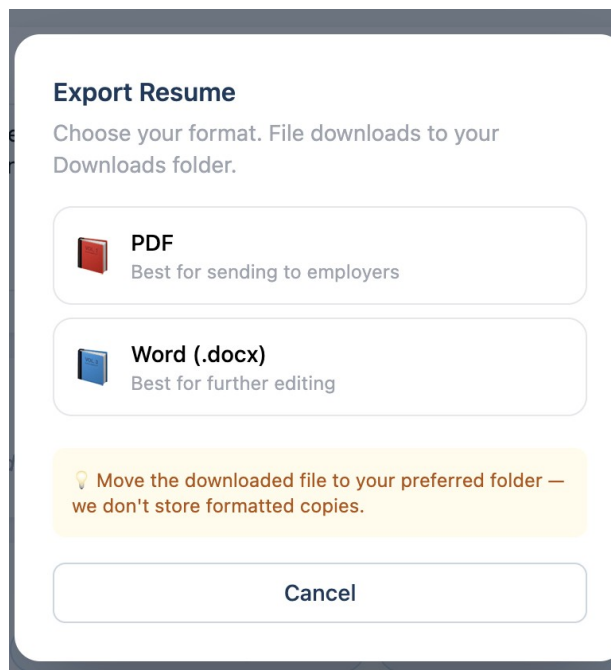

Review the extracted sections. Edit anything that needs correction. Your resume auto-saves as you edit.

AI Review

Click "AI Review" to get suggestions for improving your resume — gaps, weak areas, missing metrics. Click "Discuss in Career Chat" to ask follow-up questions about the suggestions.

Export

Gives you the option to export to .docx or pdf format.

Clear

Erase your resume completely. Do this if you want to start uploading again a brand new version.

i Build your master resume once, keep it updated. Every AI feature in the app reads from this resume automatically.

6. Installing the Job Capture Bookmarklet (Beta)

The bookmarklet (Beta) lets you capture job listings from any website (LinkedIn, Indeed, JobStreet, company career pages) with one click. This feature is in Beta — it may time out on some pages. You can always add jobs manually from the Jobs tab.

Step 1: Show Your Bookmarks Bar

In Chrome or Edge: press Cmd+Shift+B (Mac) or Ctrl+Shift+B (Windows) to show the bookmarks bar. Note this Capture Job feature is still in Beta and may not work well and subject to frequent time out. If it happens, just use simple copy and paste for job description and create job manually.

Step 2: Install the Bookmarklet

In CareerPocket AI, go to the Settings tab. Find the "Job Capture" section. Drag the "Capture Job" link to your bookmarks bar.

Step 3: Capture Jobs

Open any job listing page in a new tab. Make sure CareerPocket AI is open in another tab in same window. Click the "Capture Job" bookmark. The job details are sent to CareerPocket AI automatically.

 *The bookmarklet works on site with only one job listed. For LinkedIn job search results, open the specific job posting first (click into the job), then click the bookmarklet. If a site has many job postings, bookmarklet is unable to detect which job you are interested.*

7. Your First Job Score

Step 1: Add a Job

Use the bookmarklet to capture a job, or go to the Jobs tab and paste a job description manually.

Add Job to Queue

Job Title *

e.g. VP of Marketing

Company *

e.g. Acme Corp

Job URL (optional)

https://...

Job Description (optional)

Paste the full job description here...

Add to Queue

Cancel

Used the bookmarklet? Auto-fill from clipboard:

 Paste Captured Job

Beta

Not set up yet? [Set up bookmarklet →](#)

Step 2: Score It

Click "Score" on the job card. The AI reads the job description against your master resume and career objectives.

The screenshot displays the CareerPocket AI interface. At the top, there's a navigation bar with 'Dashboard', 'Jobs', 'Applications', 'Tasks', 'Resume', 'Career Chat', and 'Settings'. The 'Jobs' tab is active, showing a list of job cards. The first card is for 'IT Business Partner & Operations Manager' at 'Ambition', with a 'New' status and a date of 29/06/2026. The second card is for 'Senior Technical Product Manager' at 'Aon', with a 'Scored' status and a score of 7.5/10. The third card is for 'Project Manager, APAC' at 'SharkNinja APAC', also with a 'Scored' status and a score of 7.5/10. Each card has buttons for 'Score', 'Track', 'Hold', 'Reject', and a trash icon.

Below the job cards, a detailed score breakdown is shown for the 'IT Business Partner & Operations Manager @ Ambition' role. The overall score is 7.5 out of 10. The breakdown includes:

Category	Score
Seniority Match	8/10
Sector Fit	9/10
Role Scope	7/10
Salary Fit	6/10
Differentiator	8/10
Competition	7/10

Below the score breakdown, there are 'GAPS TO ADDRESS' listed:

- ⚠ Lack of experience in leading Service Delivery and Operational Support teams.
- ⚠ Insufficient experience managing Cyber Security, Cloud Services, and Enterprise Technology environments.

A 'Lead Angle for Cover Letter' is provided: 'With over 10 years of proven IT management experience within the hospitality sector, I am well-equipped to drive operational excellence and align technology initiatives with business goals.'

At the bottom, there are buttons for 'Discuss / Disagree' and 'Done'.

On the left, a smaller window shows the job card for 'IT Business Partner & Operations Manager @ Ambition' with a loading spinner and the text: 'AI is scoring this role... Analysing the JD against your profile'.

Step 3: Review the Breakdown

You'll see a score from 0–10 with a breakdown across multiple criteria: seniority match, sector fit, role scope, salary alignment, and your differentiating angle. The AI also flags specific gaps honestly, as well as positioning angle if you still want to try applying for the job.

Usually, a score below 6 may not be worth your time to apply.

If you have any questions on the score or want to offer additional details to help AI review your score, click Discuss/Disagree to go into Career Chat. Career Chat remembers the score and you can ask your question from there.

Step 4: Decide

“Track” moves to your Applications pipeline), “Hold” to keep for later and remove from active view, or “Reject” to remove from queue.

Once job moves to Application pipeline, you can track them along with other jobs from there.

The screenshot displays the CareerPocket AI interface, specifically the 'Applications' section. At the top, there's a navigation bar with links to Dashboard, Jobs, Applications (active), Tasks, Resume, Career Chat, and Settings. The main header shows 'CareerPocket AI' and 'v1.2.0'. Below the navigation bar, the 'Applications' section is titled, with a '+ Add Application' button. A summary row shows the status of applications: 1 New, 2 Applied, 0 Screening, 0 Interview, 0 Offer, 0 Accepted, 0 Withdrawn, and 0 Rejected. A filter bar below this shows 'All (3)' selected, with other filters for New (1), Applied (2), Screening (0), Interview (0), Offer (0), Accepted (0), Withdrawn (0), and Rejected (0). The main content area lists three applications:

- Senior Product Manager** (Applied) at Food Panda. Applied: 2026-06-26, Follow-up: 2026-07-03, Score: 7.5/10, by Johnny Woo. Actions: JD ✓, Cover Letter ✓, Resume ✓, CL+Resume ✓, Generate Cover Letter, Generate Tailored Resume.
- Operational Technology Security Technical Program Manager** (Applied) at Google. Applied: 2026-06-26, Score: 6.5/10. Actions: JD ✓, Cover Letter ✓, Resume ✓, CL+Resume ✓, Generate Cover Letter, Generate Tailored Resume.
- AppleCare Technologies Project Manager** (New) at Apple. Score: 5.8/10. Actions: JD ✓, Cover Letter ✓, Resume —, CL+Resume —, Generate Cover Letter, Generate Tailored Resume.

8. Cover Letters and Tailored Resumes

Cover Letter

From the Applications tab, expand an application card and click "Generate Cover Letter". The AI generates a tailored letter using your resume, the job description, and your positioning angle. Edit the text directly in the opened window if you like, then use "Save", "PDF", or "Word" to export. After you make some edits, you can ask AI to polish to refine the edits you have made. Alternatively, you could also ask CareerPocket AI to regenerate the cover letter, and may end up with a different version of cover letter, especially if you use a different AI engine to power it.

Cover Letter ×

Dear Hiring Manager,

I was drawn to AppleCare Technologies Project Manager role at Apple because of its emphasis on supporting and enhancing Enterprise systems and processes across the Asia-Pacific region. As a seasoned IT professional with over a decade of experience in the hospitality industry, I have honed my skills in managing complex projects and leading cross-functional teams. My background in managing Property Management Systems (Opera), Point of Sale (POS) systems, and deploying Microsoft 365 solutions aligns closely with Apple's need for someone who can drive operational excellence and facilitate smooth transitions within the business.

One of my most significant achievements was overseeing the rollout of Microsoft 365 across all departments at Riverside Boutique Hotel. This project not only streamlined our email management and document collaboration but also enhanced data security, compliance with PDPA regulations, and improved overall productivity. The successful implementation led to a 20% increase in operational efficiency and a 30% reduction in IT support tickets, demonstrating my ability to manage large-scale initiatives and deliver measurable results.

Downloaded to Downloads folder. Move it — we don't store formatted copies.

Tailored Resume

Click "Generate Tailored Resume" on the same application. The AI reorders your competencies, adjusts your summary, and highlights the most relevant experience for that role — optimised for ATS keyword matching. This does not overwrite your master resume.

The screenshot shows a web application window titled "Tailored Resume" with a close button (X) in the top right corner. The resume content is displayed in a scrollable area and is organized into three sections:

- PROFESSIONAL SUMMARY**
With over 10 years of experience managing IT systems and supporting hotel operations, I am highly skilled in technical project management and cross-team collaboration. My expertise in implementing Microsoft 365, conducting threat assessments, and maintaining high system reliability aligns closely with the needs of a Technical Program Manager role at Google.
- CORE COMPETENCIES**
 - Program Management
 - Cross-functional Team Leadership
 - Incident Response
 - Threat Assessments
 - Network Management
 - Vendor Coordination
- PROFESSIONAL EXPERIENCE**
IT Manager at Riverside Boutique Hotel, Singapore (Jan 2019 – Present)
 - Managed all IT systems and infrastructure for the hotel, ensuring smooth operations.
 - Handled day-to-day IT support for hotel staff, resolving technical issues promptly.

At the bottom of the scrollable area, there is a row of action buttons: "Copy" (with a clipboard icon), "PDF", "Word", "Save edits", "Regenerate" (with a circular arrow icon), and "Polish" (with a star icon). Below these buttons, a message states: "Downloaded to Downloads folder. Move it — we don't store formatted copies."

Polish Button

You can directly edit the generated resume if you like. After editing a cover letter or tailored resume, click the Polish button to have the AI refine your edits — improving language without discarding your changes.

Exports

Both cover letters and tailored resumes can be exported as PDF or Word (.docx). The export uses a fixed professional layout with your name, tagline, and contact details at the top.

 *Generate the cover letter first, then the tailored resume. The tailored resume aligns with the positioning angle from your cover letter for a consistent application package.*

Combined Cover Letter & Resume

Some application portals (such as LinkedIn Easy Apply) accept only one uploaded document. In this case, you might want to submit a single document that includes a cover letter followed by your tailored matching resume.

Click the  CL+Resume tile on any application card to open both your cover letter and tailored resume in a single editable view. This is possible only when both cover letter and resume has been generated.

A page break divider separates the two sections.

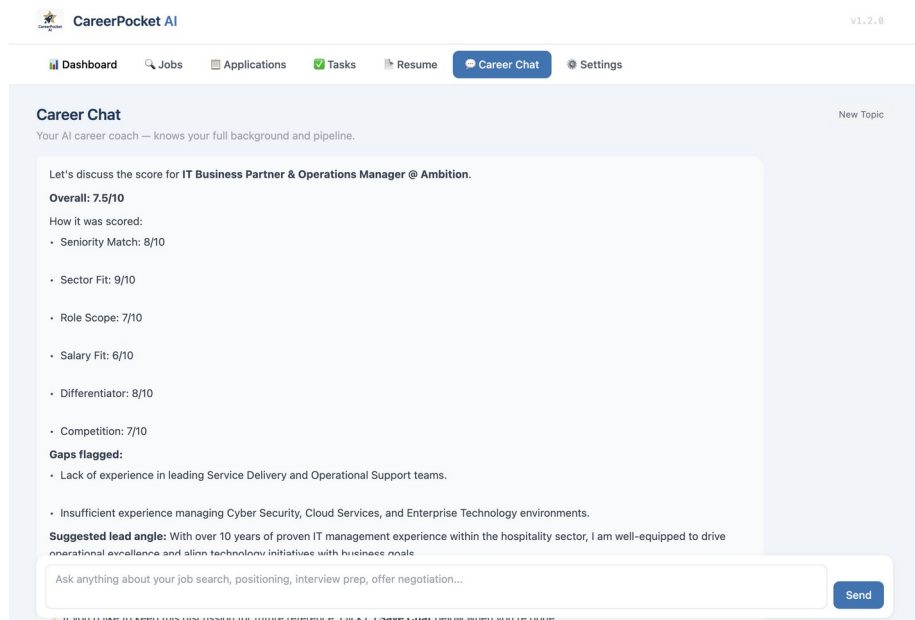

Edit if needed, then click PDF or Word to export. The cover letter appears first, followed by your tailored resume with your full professional header (name, tagline, contact details).

9. Career Chat — Your AI Advisor

Career Chat is a persistent AI advisor that knows your full background, application pipeline, and career objectives. Ask it anything:

- "How should I position myself for this role?"
- "What questions should I prepare for the interview?"
- "How do I negotiate this offer?"
- "What are my strongest selling points for this sector?"
- "Review my cover letter draft."
- "How can I improve my score for this particular job?"

Chat history is saved. Click "New Topic" to start a fresh conversation. Your resume context is always included automatically.

10. Switching Computers

If you set up a cloud backup folder, switching is seamless:

1. On your new computer, open Chrome or Edge.
2. Visit <https://careerpocket.trusted-aide.com>
3. Click "Already on another computer? Restore from backup folder".
4. Select the same Dropbox, OneDrive, or Google Drive folder, or the folder which you have your manual backup file from the other computer.
5. Your license key, AI key, resume, jobs, applications — everything restores automatically.

 *We recommend using a cloud storage for backup. Then the only thing you need to remember is which cloud folder you selected during setup.*

11. Getting Help

Browser Permissions: If Chrome asks to re-grant folder access, click "Allow". This happens after browser restarts and is normal.

AI Not Working: Check your API key in Settings. Verify you have credits with your AI provider. Check your internet connection. If using a local model, make sure it's running.

Bookmarklet Not Capturing: Make sure CareerPocket AI is open in another tab in the same browser. Open the specific job page (not a search results list). If the bookmarklet is outdated, re-install it from Settings > Job Capture. Note that Book Marklet is not yet reliable, and always fall back on manually creating job.

Data Safety: All data stays in your browser and your chosen backup folder. Nothing is sent to our servers. AI requests go directly to your chosen provider.

For support, contact: support@trusted-aide.com

CareerPocket AI — trusted-aide.com — Your data. Your browser. Your career.
